These production figures are an indication of the relative performance of the individual animal in relation to the rest of his drop at the time of measurement.

**Rebate:** 2% to agents introducing buyers in writing prior to sale or accompany buyers to the sale and settling within 7 days.

**Delivery:** Immediate or by arrangement

# *Welcome*

Our 41st annual ram sale will be held at the Warren Racecourse on Wednesday the 9th of October 2024. To be offered; 8 specially selected March shorn and 150 grass fed April shorn July / Aug 2023 drop rams.

All sale rams have been individually filmed by Struan & Monika Pearce, Stud Stock Sale. Video link of each ram will be available for viewing either through AuctionsPlus or our website. A terrific opportunity to view each animal prior to the day. Once again, we will be interfaced with AuctionsPlus so buyers who are unable to make the day may bid remotely or those in the industry who wish to follow the sale can.

An impressive draft that showcases our breeding direction, continuing to focus on the important fundamentals of breeding a merino. The rams have been naturally grown out at Eenaweena on our native pastures. The draft average micron is 19.1 & all showcasing bright white well-nourished wool with a very soft handle. Body Weight is fractionally lower than last year due to the dry finish in 2023. Management decisions through the year naturally selects rams that have the ability to adapt to limited forage.

Egelabra have a wonderful history of selling our top line genetics to clients allowing them to advance alongside the stud. The 2024 sale team is the perfect example. Six of the top eight specially selected rams are by sires that have been purchased in recent years.

Lots 1 & 2 x HEK 212749. Sire purchased by Will & Marcelle Chandler Barcaldine in 2022 (7 in sale)

Lots 3, 4 & 7 x HEK 213818. Sire purchased by Peter Keary Crookwell in 2022 (4 in sale)

Lot 5 x HEK 200014. Sire purchase by H M Lowe Yeoval in 2021 (9 in sale)

There could be an opportunity for the astute merino breeder with the recent sales of young merino ewes into the meat market, leaving a shortfall for some breeders in the next 12 - 20 months. Whether lambs could be worth holding, shearing a little later and feeding in the Autumn if the barley price stays low.

We welcome back Jack Kelly to Egelabra as Stud Classer starting in January 2025. Cutting his teeth classing our commercial flock ewes at Colane station and working alongside Duncan and myself on the stud this year has been a good introduction to his new role. Jack jackarooed for 2 years at Egelabra and overseed at Yanganbil for 1 before working in New Zealand for a year. Returning to Australia to complete the Agi Business course at Marcus Oldam College & taking up a management position with Gordon Welsh at Locksley Station Nyngan for 3 years.

Rams will be penned on the day from 9.00am for inspection. Please do not hesitate to call if you wish to inspect the draft prior to sale day.

We look forward to catching up on the 9th of October

*Cam Munro*

# JULY/AUGUST 2023 DROP – SIRE DESCRIPTION

## Star Performers

All Sire Tests are taken at 18 months of age.

GFW (Greasy Fleece Weight) is 8 months of wool growth at 18 months of age.

\*The 2023 Drop Top 100 have been retained from the total number of rams bred (2200).  
Special Sires and General Sires.

*The following conditions shall apply to all rams sold by  
HE Kater & Son Pastoral Co Pty Ltd (Egelabra).*

## **RETENTION OF HALF SEMEN SALE PROCEEDS**

1. In the event that the buyer elects to market semen from the ram he has purchased, the buyer shall account and pay to the seller one half of the net proceeds there from.
2. The buyer shall not market semen from the ram he has purchased, other than on terms consistent with industry practices, without the consent of the seller.
3. The buyer shall not sell or assign any interest in the ram he has purchased without first ensuring that the purchaser entered into a Deed of Covenant with the seller binding the purchaser to the seller in the manner stated in conditions 1 and 2.

# MEASUREMENTS & SELECTION

## MEASUREMENTS

**Fibre Diameter (Micron):** Fibre diameter is presented as the actual micron on each individual ram. Test were taken from the mid-side on the 1st August 2024.

**Standard Deviation (SD):** A measure (in microns) either side of the mean fibre diameter in which 68% of fibres lie.

**Co-efficient of Variation (CV):** Measures the spread of fibre diameter variation relative to the average. It is calculated by dividing the standard deviation (SD) by the mean fibre diameter then multiplying by 100.

**Comfort Factor (CF):** The percentage of fibres less than 30 microns in a sample. i.e. 100% Comfort Factor = 0% of fibres greater than 30 microns.

**Greasy Fleece Weight (GFW%):** This is the post weaning fleece weight (6mth wool growth from Tip shearing 23/10/23) measured as a percentage relative to the average of the year drop. (Average = 100)

**Eye Muscle Depth (EMD):** This is the depth of the eye muscle, measured at the C site (45mm from centre of the spine).

**Fat Depth:** This is the measurement of fat depth at the C Depth. A deeper measurement indicates a fatter carcass.

**Weight:** Body Weight recorded 03/09/2024

## SELECTION PROCEDURE

It is to be remembered that measurements provided are only one part of ram selection.

Rams must be visually acceptable for characteristics which the buyer is seeking. They must be suitable for the environment in which they are going to be used. Buyers must ensure that they are satisfied with the conformation, size, and wool type of the ram.

Having obtained the correct visual ram type the buyer can then use the measurement information as an aid in the selection of rams.

## ESTIMATED BREEDING VALUES – 7 YEARS OF ANALYSIS WITHIN EGELABRA FLOCK

The Within Flock indexes displayed rank the male progeny of the 2023 drop at Egelabra for the two indexes described below. These are based on within flock rankings measured trait performance including, Yearling Body Weight, Fleece Weight, Fibre Diameter and Co-efficient of Variation. Visual assessment and individual trait performance must be considered in conjunction with the index.

A value of 100 is the median or middle of the drop. A value of 120 is 20% better, while 80 is 20% below the median.

**Within Flock Merino MP+ Index:** This index is suited to a self-replacing Merino production system. Surplus progeny sold as hoggets after shearing. Expected responses to MP selection are moderate increases in body weight and fleece weight and reduction of fibre diameter.

**Within Flock Merino DP+ index:** This index suites a meat focused or Dual-Purpose operation. Surplus progeny sold as lambs and a proportion of ewes are joined to terminal sires. Expected responses to DP selection are large increases in body weight, while maintaining fibre diameter with moderate increase in fleece weight.

## DISCLAIMER

Fleece, EMD & Fat depth information has been measured independently of Egelabra Merino Stud and prior to the auction. Such information is provided as a guide only. Egelabra Merino Stud accepts no responsibility for the accuracy nor the repeatability of the information supplied in this catalogue.
